FDA-Status

FREIOTHERM-Powder Coating PI1003NRA732 pebble grey RAL 7032

Our suppliers of the raw materials of PI1003NRA732 have confirmed that the regulation by Food and Drug Administration – FDA for the direct food contact is ensured (for example CFR 175.300 "Resinous and polymeric coatings").

We point out you that the managing specifications concerns only the material composition of the products. In all regulations beyond that request are determined to the ready for use coating. For direct contact of food with the coating given limits values for the migration of contents materials from the coating are to be considered. The fulfilment o these requirements is situated in the responsibility of the final consumer. The necessary analytic investigations are executed by independent testing institutes.

The coating must be dried with considerations of their composition in such a way that from them no volatile proportions can transmit into the food and their surface.
